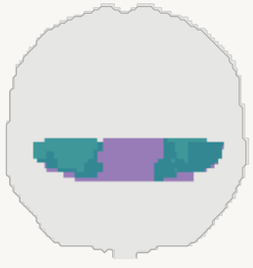
A

Independent OFC ROIs



Medial/posterior-lateral OFC

Central/anterior-lateral OFC

Coronal maximum projection

Within-probe RSA (B,D)

Premeal cue patterns → Neural RDM ρ Odor-identity RDM

same = 0; different = 1

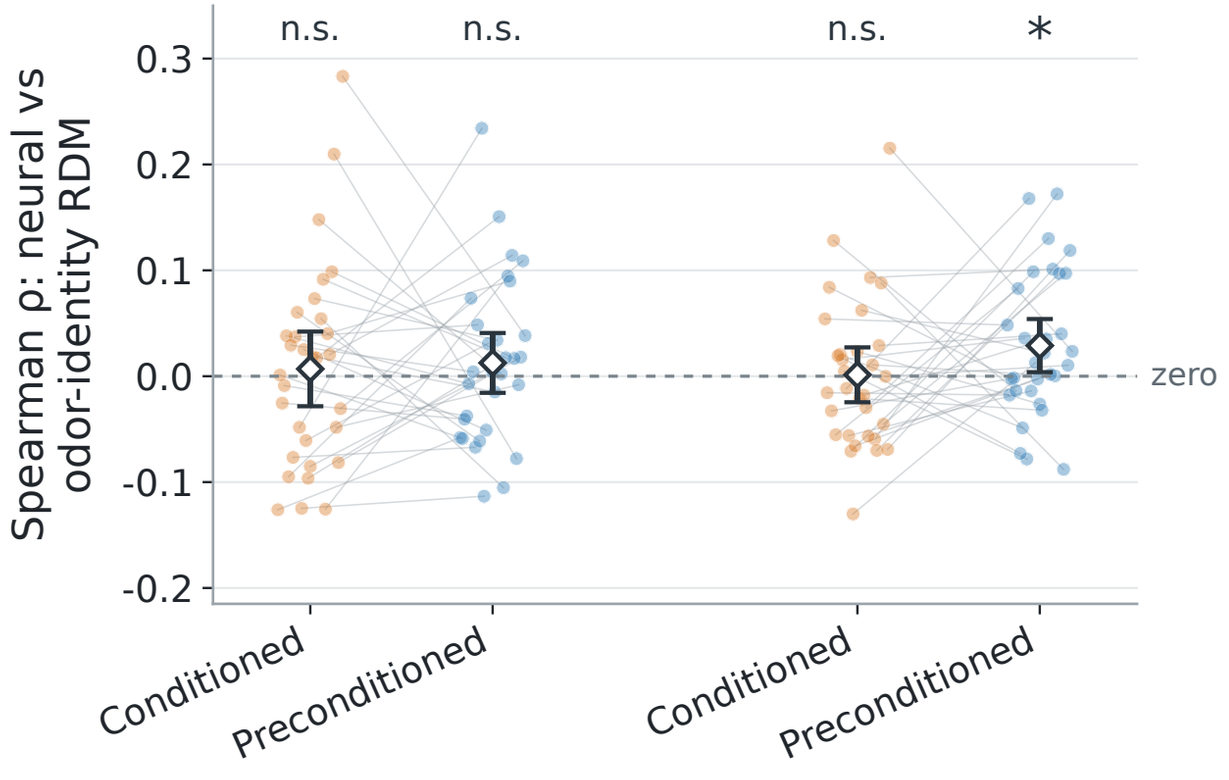
Perception-to-cue decoding (C)

Passive odor patterns → (train) Linear SVM → (test) Premeal cue odor identity

odor 1 vs odor 2

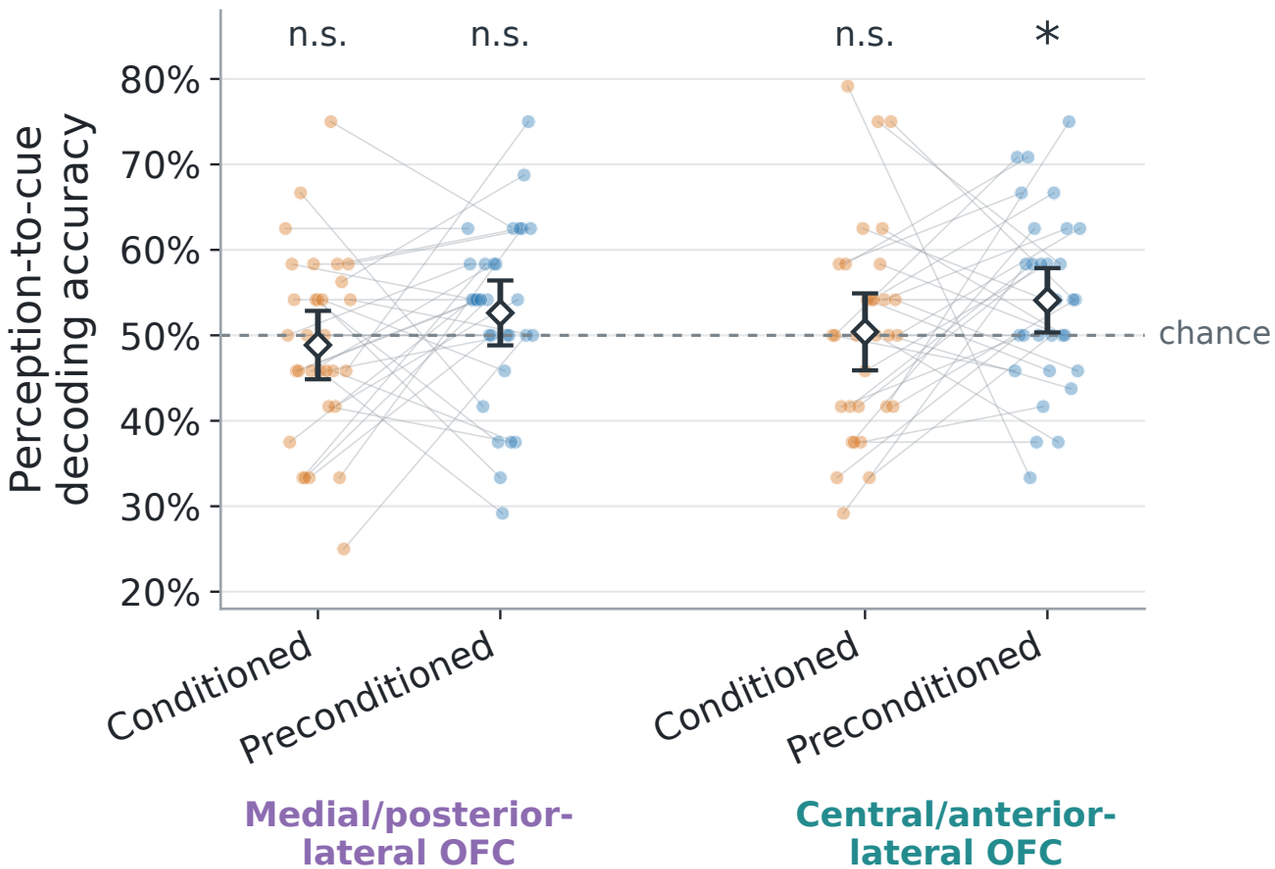
B

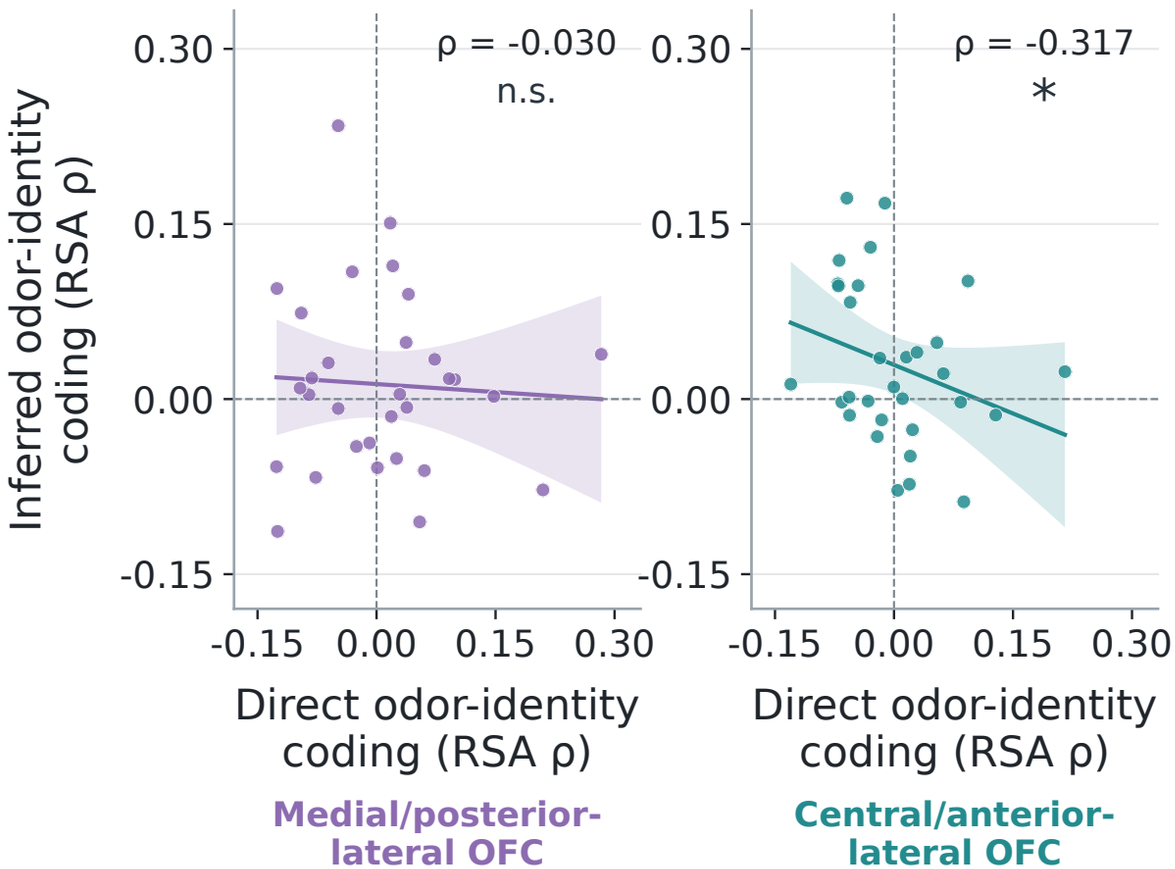
Representation of predicted odor identity



C

Sensory reinstatement of predicted odor identity



D


Competition between direct and inferred odor-identity representations
